

Subraya Hegde

Senior Manager - Technical & Management

Bangalore | (+91) 88612 46975 | subrayahegde@gmail.com | www.linkedin.com/in/subrayahegde

Results-driven senior IT professional with rich experience in delivering complex projects across various domains. I bring expertise in web development using latest tools/technologies and AI integrations (ex. LLM, Chatbot, RAG, MCP), supported by strong strategic planning, pre-sales leadership, and client-relationship building skills. Skilled in leading cross-functional teams and managing portfolios up to \$1m per quarter, I've consistently achieved a 7/7 SCAT score, driven 15-20% QoQ revenue growth, and boosted productivity by 15% through process optimization and reusable assets. Proficient in Agile Scrum, stakeholder and risk management, P&L, Billing/Invoices.

Skill Set / Tools Knowledge

Programming: Python, Django, Jupyter/Colab

AI/ML: Machine Learning, NLP, Generative AI, LLMs, RAG (PDF, Q&A, summarization), Vision models

Model Integrations: Llama, Mistral, OpenAI ChatGPT, Gemini, HuggingFace, LangChain, Groq APIs,

Ollama (for open-source / offline models)

Vector/Graph Databases: Experience with embedding generation and similarity search

AI-driven development: Copilot, Cursor, Gemini CLI, v0.dev, bolt.diy, antigravity, etc.

Web Development: next.js, streamlit, authentication flows, API integrations

Agents & Automation: Experience building AI Agents and workflows using n8n, Make, Bubble, etc.

Others: MCP servers, Chatbot development and LLM integration with modern front-end frameworks

Foundational: MS Project, MS Office, Jira/Asana, .Net, J2EE, CMS, JavaScript, Next.js, REST API,

RDBMS/NoSql, Messaging & Queue systems, DevOps (CI/CD), AWS and Azure cloud, etc.

Professional Experience

Independent Consultant (Generative AI), Bangalore, India

(01/25 to date)

Actively working in the Generative AI space with a focus on building real-world AI applications, integrating LLMs into web platforms, and exploring cutting-edge AI tooling.

Key Focus Areas:

- Hands-on learning in Artificial Intelligence, Machine Learning, and Generative AI.
- Experimenting with a wide range of LLMs and AI tools, including open-source and commercial models.
- Building end-to-end AI-powered web applications, chatbots, RAG and MP-based integrations.

Selected AI Projects:

1. Legal Contract Risk Analyzer (AI enabled Full-stack SaaS based app): A modern AI-powered tool (with login authentication and subscription-based plans), that analyzes uploaded contract documents and highlights potential risks, liabilities, and unfavorable clauses. (Tech stack: next.js, postgres, prisma, razorpay payment gateway, typescript, tailwind/shadcn, Gemini AI, Google Vision/Translation APIs, Mistral AI, Next Auth (with 5 different providers). Live App: <https://ai-contractanalyzer.vercel.app>

2. Multi-Modal Python AI Explorer: python/streamlit based app to experiment with various AI models and their capabilities, including: Contract risk analysis, Handwritten medical prescription interpretation, medical illness suggestions from scanned images, Invoice parsing, YouTube summarization and Q&A, Story generation, etc. Live App: <https://sample-ai-apps-using-python.streamlit.app>

Worked as a Sr. Project Manager at Infosys Ltd, Bangalore, India

(03/2012 to 10/2024)

a) Sr. Pre-sales Manager (UI & CMS Practice)

05/2024 – 10/2024

Led a team of 8 (Consultants, Architects and Leads/SMEs) to provide responses to various proposals under UI/CMS practice for North America region.

Responsibilities/Achievements:

- Accelerated business (in UI/CMS practices) growth by ~20% for 3 consecutive quarters through value-driven proposal leadership and innovative solutioning.
- Architected winning proposal strategies (RFP/RFI/PoVs) by translating complex client requirements into technically sound, cost-optimized solutions aligned with existing landscapes.
- Enabled Sales to close high-value opportunities by leading orals, demos, and technical validations, ensuring solution confidence and revenue conversion.
- Operationalized a reusable solution repository with the Value Design team, achieving 50% faster proposal turnaround and major productivity gains.
- Enhanced competitive positioning by continuously benchmarking Infosys' offerings against market competitors and tailoring narratives accordingly.
- Cultivated deep client and sales partnerships, strengthening long-term engagement and trust with customers.

b) Project Manager / Scrum Master (FKC, Edgeverve, India)

04/2023 - 04/2024

Finacle Knowledge Center (FKC) is SharePoint based portal, wherein all Finacle banking products (multiple products with multiple versions) can be published. The current system comprises of 1.1 TB of data consisting of Manuals, Release Notes, API guides, Data Dictionary, ERD and Videos. The scope is to – Implement the same functionality for both intranet (Finacle) and internet (Banks) users in Sitecore XP 10.3, Migrate the SP content to Sitecore and host the solution on Azure PaaS.

Responsibilities/Achievements:

- Directed end-to-end transformation of FKC (1.1TB+ content) to Sitecore XP 10.3 on Azure PaaS, ensuring on-time migration and zero data loss.
- Elevated team productivity by 15% by embedding Agile Scrum principles, mentoring junior developers, and standardizing reusable component libraries.
- Delivered business-aligned milestones through strong cross-functional collaboration (ISG, UX, and product teams), ensuring stakeholder buy-in and measurable progress.
- Governed a \$900K/quarter client portfolio, strengthening account retention (95%) via proactive delivery assurance, stakeholder management, and risk mitigation.

Tech stack: Sitecore XP 10.3, jquery, javascript, html/css, RWD, C#, Visual Studio.Net, Azure Paas

c) Scrum Master (VI Backend & Mobile App, Assurant, USA)

10/2021 – 01/2023

It's a Vehicle Inspection (VI) system to check and process the accident claims. The system consists of Node.js based backend (for Admin to create/modify/view inspections, shops management, TPA Integrations, reports) and a Flutter based Android/iOS mobile app for the insured users.

Responsibilities/Achievements:

- Drove end-to-end Agile delivery for a cross-platform vehicle inspection system (Flutter & Node.js), improving app stability and reducing crash frequency by addressing top 3 recurring defects.
- Reduced release timelines by 15% through the adoption of lean delivery practices, rigorous peer reviews, and sprint retrospection improvements.
- Improved transparency and stakeholder satisfaction by leading sprint demos, backlog refinement, and delivery showcases with client partners.
- Scaled the delivery unit's talent base by leading recruitment initiatives—hired 50+ laterals with a 25% success rate—to support growing client demand.
- Maintained a \$600K/quarter delivery pipeline, balancing multiple digital engagements across design, build, and support phases.

Tech stack: flutter, node.js, javascript, VS Code, AWS, GitHub, Jira

d) Digital Project Manager (MembersWorld, Bupa Global, UK)**01/2020 - 08/2021**

It's a cross-platform Mobile app (Xamarin based) to manage details of individual's healthcare plan, get pre-authorization request for treatments, submit/track/view claims, apply for a second medical opinion, GVC (Global Virtual Care) - access to 24-hour live webchat service, Facility Finders, etc.

Responsibilities/Achievements:

- Delivered Bupa's flagship MembersWorld app (Xamarin), increasing user engagement by 20% and securing a 4.3-star app rating across stores.
- Streamlined release velocity by embedding automated testing workflows, cutting post-deployment defects by 30%.
- Strengthened stakeholder alignment by partnering with the Product Owner to shape prioritized roadmaps and agile delivery cadences.
- Achieved perfect CSAT (7/7) for four consecutive quarters, reflecting client trust and operational excellence.
- Enabled digital capability uplift by mentoring 70+ team members toward certifications in React, Flutter, and modern UI frameworks within a single year.

Tech stack: Microsoft.Net, Xamarin, C#, Visual Studio.Net. Azure Devops, GitHub

e) Project Manager (NGIS, Northwestern Mutual, USA)**04/2015 - 11/2019**

Responsibilities/Achievements:

- Delivered multiple web modernization projects for the client by applying scalable UI frameworks (React, Angular), ensuring maintainability and performance gains.
- Boosted delivery efficiency by 15% through reusable UI component libraries and front-end best practice frameworks.
- Secured additional \$500K in follow-on work by driving client confidence via consistent delivery quality and proactive stakeholder engagement.
- Institutionalized front-end governance standards (coding guidelines, TDD, best practices), enhancing code reliability.

Tech stack: Node.js, npm, react.js, redux, jasmine, vs code, javascript, responsive web design (RWD), TDD, github, postman

f) Project Manager – VOC, Harley Davidson, USA**04/2012 - 01/2015**

- Led the roll-out of VOC for the client, successfully launching four functional modules that streamlined L1/L2 operations.
- On-boarded 100+ users through targeted enablement programs, accelerating adoption and operational readiness.
- Established foundational governance for VOC product evolution, aligning delivery teams and client stakeholders during the product evangelization phase.

Tech stack: SharePoint, ASP.Net, C#, javascript, html/css

Previous Employments

- Project Manager, Tech Mahindra Ltd. Pune, India (04/2005 to 12/2009)
- Project Lead, Cyient (Infotech Enterprises), Hyderabad, India (02/2002 to 02/2005)
- Programmer Analyst, Concio Inc, CA, USA (01/2000 to 10/2001)

Education, Trainings and Awards

- BE (Electronics & Communications) – BVB College of Engineering, Hubli, Karnataka
- ITIL Foundation Course and Brainbench certified ASP Developer
- Inspire (Pride) award - Infosys Ltd. (09/2015)
- Best Team award - Tech Mahindra Ltd (06/2009)
- Employee of the Month award - Infotech Enterprises Ltd. (04/2004)
